The CX200 Series is a microprocessor based timer/counter housed in a standard 15 terminal CYCL-FLEX® plug-in case. Time or count operation, time range, and standard or reverse start operation is selected by 7 miniature rocker switches located inside the unit housing.

Time or count setpoints are entered into the unit using a sealed membrane keypad on the front of the unit. Each digit in the setpoint is individually increased or decreased by pressing the appropriate keypad switch.

Time or count setpoint and progress is displayed on the front of the unit by a 4 1/2 digit liquid crystal display with .5 inch digits. Time or count subtracts from the setpoint and the output changes state at zero.

Operational mode annunicators also appear in the display area on the front of the unit. The mode annunciator flashes when the unit is timing or counting.

- Five different time ranges
- Two count rates
- Two relay outputs - socket mounted for easy replacement
- N.O. solid state MOSFET, delayed action switch rated at 1 ampere continuous load current, 0-264 VAC 50/60 Hz or DC
- Ideal output for switching low level signals and high voltage loads
- Programmed outputs operate in one of four load sequences
- Standard start is defined as ON delay reset timer or counter
- For standard start units, timer/counter resets on power failure
- Non-volatile memory data retention

ORDERING INFORMATION

Available Models
CX202A6 10 amp Relay Output, 120VAC, 50/60Hz
CX202B6 10 amp Relay Output, 240VAC, 50/60Hz
CX202K6 10 amp Relay Output, 208VAC, 50/60Hz

Enclosures
HN308 NEMA Class 1, Surface Mounting with Terminal Block
HN364 NEMA Class 1, Surface Mounting without Terminal Block

ACCESSORIES
HP50-131 CYCL-FLEX Water-Sealed Housing
HP50-133 Surface Mounting Adapter to use in place of brackets
