Introduction
Within the Danaher Controls A103 family you’ll find a product to meet nearly every requirement for panel mounted control and indication. Housed in a DIN standard 36mm x 72mm case, the A103-004 is perfect for advanced rate indication applications. An input scale factor enables the display to read in meaningful engineering units such as gallons per minute or pieces per hour. A time interval (1/\(\tau\)) calculation is used to assure accurate rate measurement.

The 4 digit super twist LCD display provides easy viewing at a glance. For conditions where ambient light is poor, the display can be backlit by connecting an external DC (10-28 Volt) power supply. A single unit can accept NPN & dry contact inputs for low speed (30Hz) counting and PNP or square wave signals for high speed applications up to 10 kHz.

Powered by either one or two replaceable 3V Lithium batteries, this unique design allows for a new battery to be installed before removing the old one, thereby retaining count total and program data. A low battery indicator appears on the screen to provide a warning several weeks before the end of battery life. If two batteries are used simultaneously, the individual expected life doubles to 10 years.

Setup is quick and simple as the two front panel keys are used to scroll through 3 menu choices. A NEMA 4X front panel and noise immunity tested to IEC 801 level 3 makes this unit suitable for harsh environments.

Features
- Large, easy to read 4-digit super twist LCD with backlighting capability
- 3 Volt lithium battery provides long life and eliminates the need for external power
- Accepts low speed (30 Hz) NPN & dry contact inputs, and high speed (10 kHz) PNP signals or square wave signals
- Time Interval Rate Measurement for increased accuracy
- Input scale factors for displaying meaningful engineering units
- Option Modules provide added functionality and convenience
- Simple menu-driven setup
- NEMA 4X rated front panel for use in washdown environments

**OPERATION**

1. **Total Display**: Indicates the present rate value, which is equal to the pulse frequency multiplied by the input calibration value.

2. **Down Key**: When the program input is active this key is used to scroll through the menu items. After a menu item has been chosen for editing, the down key is used to set the value for the currently selected (flashing) digit.

3. **Next/Reset**: When the program input is active this key is used to select a menu item for editing (left most digit will begin to flash) and then move to the desired digit to be changed.

---

**REAR TERMINAL CONNECTIONS**

1. **Common**

2. High Speed Input A - PNP or square wave signals up to 10 kHz for incrementing the count value

3. Low Speed Input A - NPN or dry contact inputs up to 30 Hz for incrementing the count value

4. Magnetic Input - Capacitive coupled inputs up to 10 kHz **

5. Front Panel Program Enable - Allows access to program mode when switched to common

6. Not Used

7. Not Used

8. DC Supply Input - For backlighting

* For high speed current sinking devices, provide a pull-up resistor from terminal 2 to a DC source

** If not used, must be tied to common
**Battery Installation** - The unit is shipped with one battery, which is not installed. Remove the battery cover by pushing inward and down. Install the battery in either of the two slots. The unit runs on a single battery, and the second slot is provided to allow for installing a new battery before removing the old one, retaining count total and program data. The unit can also be run on two batteries to extend the battery life to 10 years. Once the battery is in place the unit will go into a self test mode, and all the segments on the LCD display will be illuminated. The self test mode is exited by depressing the Next key, which will then display the model number (4). Depress the Next key again to ready the unit for operation.

**Front Panel Installation** - Place the unit in the panel through the 33mm x 68mm cutout. Slide the included gasket over the rear of the unit, then slide the panel mount bracket into place so that the 4 tabs catch in the groves on the top and the bottom of the unit (the bracket should be oriented so that the tabs are on the side nearest the panel). Use the provided panel mount screws to tighten the bracket until there is a secure seal against the gasket.

**Programming**

Programming parameters can be accessed, when the Program Enable input is active, by pressing the Down key. To edit a parameter use the Down key to scroll until the desired parameter appears on the screen. Pressing the Next key will cause the leftmost digit of that value to begin to flash. Use the Next and Down keys in combination to choose individual digits and change their value.

**Rate Calibrator Decimal Point:** Sets the decimal position to be used with the Rate Input Calibrator in a range from X.XXX to XXXX.

**Rate Input Calibrator:** Multiplies the input frequency by this value and displays the results as the rate value. In combination with the Rate Decimal Point Parameter the calibrator value can be set in a range from 0.001 to 9999.

**Rate Display Decimal Point:** Sets the decimal position to be used for the rate display in a range from Off to 0.000. This parameter can also be used to set a dummy zero (0) which enables the rate display to have 5 digits with the LSD always being 0. The Next key is used to scroll through the choices.
**SPECIFICATIONS**

**High Speed Input (Terminal 2):**
Type: PNP signal or square wave pulse  
Count Speed: 10 kHz max (50% duty cycle)  
Logic: Low < 1.0 VDC, High > 2.0 VDC  
Minimum Pulse Width: 45 µsecond  
Maximum Input: 28VDC

**Low Speed Input (Terminal 3):**
Type: NPN Signal, Contact Closure  
Count Speed: 30 Hz max (50% duty cycle)  
Logic: Low < 1.0 VDC, High > 2.0 VDC  
Minimum Pulse Width: 12 ms  
Maximum Input 28VDC

**Front Panel Enable Input (Terminal 5):**
Type: NPN Signal, Contact Closure; level sensitive  
Maximum Input: 28 VDC

**Magnetic Input (Terminal 4):**
Impedance: Capacitive coupled input  
Count Speed: 10kHz (50% duty cycle)  
Sensitivity: 0.2 volt peak  
Maximum input: 28 VDC

**Power Source:**
Type: Single or dual 3V Lithium battery  
Expected Life: 5 years typical-single battery, 10 years typical-dual batteries  
Low Power Indicator: "Low Bat" flashes on display approx. 2 weeks prior to end of battery life

**Display:**
Type: Supertwist LCD for use with or without backlighting  
Number: 4 digits, plus dummy zero  
Height: 12mm  
Backlighting: Green illumination over whole viewable area with a 10 to 28 VDC supply (Terminal 8)

**Physical:**
Dimensions: 36mm x 72mm, 38mm deep  
Mounting: Panel Mount (mounting bracket supplied)  
35mm x 65mm (+ 0.3mm) panel cutout  
Connections: Up to 8 screw terminals  
Weight: Approximately 2.25 ounces

**WARRANTY**

Standard products manufactured by the Company are warranted to be free from defects in workmanship and material for a period of one year from the date of shipment, and products which are defective in workmanship or material will be repaired or replaced, at the option of the Company, at no charge to the Buyer. Final determination as to whether a product is actually defective rests with the Company. The obligation of the Company hereunder shall be limited solely to repair and replacement of products that fall within the foregoing limitations, and shall be conditioned upon receipt by the Company of written notice of any alleged defects or deficiency promptly after discovery within the warranty period, and in the case of components or units purchased by the Company, the obligation of the Company shall not exceed the settlement that the Company is able to obtain from the supplier thereof. No products shall be returned to the Company without its prior consent. Products which the Company consents to have returned shall be shipped F.O.B. the Company's factory. The Company cannot assume responsibility or accept invoices for unauthorized repairs to its components, even though defective. The life of the products of the Company depends, to a large extent, upon the type of usage thereof, and THE COMPANY MAKES NO WARRANTY AS TO FITNESS OF ITS PRODUCTS FOR SPECIFIC APPLICATIONS BY THE BUYER NOR AS TO PERIOD OF SERVICE UNLESS THE COMPANY SPECIFICALLY AGREES OTHERWISE IN WRITING AFTER THE PROPOSED USAGE HAS BEEN MADE KNOWN TO IT.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE.
